

# AFRICA TO ASIA

## Testing Adaptation in Flood-Based Resource Management

### Main objectives:

to solidify the know-how on flood-based livelihood systems (FBLs) by upscaling the knowledge-base both geographically and content wise.

### Expected outcomes:

Contribute to the building-up of practical knowledge and national and local capacity to systematically and comprehensively support the productive use of all the various types of Flood-Based Livelihoods Systems (FBLs).

### Project components:

- FBL network establishment and strengthening
- Knowledge development and solution management
- Capacity building
- Support to investment programmes and policies

## TURNING ENVIRONMENTAL HAZARDS INTO OPPORTUNITIES
